Mark 

Miguel Ángel García declares:

As manager of the General Lighting division in Normagrup Technology S.A, that the luminaires manufactured under the brand "SIGNE" comply with:

All the essential low voltage products requirements established on the 2014/35/UE directive.

- NORM EN IEC 60598-1:2021, regarding luminaires.
- NORM EN IEC 60598-2-1:2021 regarding particular requirements in luminaires.
- NORM EN IEC 60598-2-3:2003 regarding luminaires used in public lighting.
- NORM EN 62471:2023 regarding photobiological safety in luminaires and devices with lamps.

All the essential electromagnetic compatibility requirements established in 2014/30/UE directive.

- NORM EN IEC 55015:2019/A11:2020, regarding limits and measurements methods of the radioelectric perturbation in lighting fittings.
- NORM EN IEC 61000-3-2:2019, regarding electromagnetic compatibility (CEM), limits for the emissions of harmonic currents (fittings with input voltage < 16A by phase)
- NORM EN 61000-3-3:2013, regarding electromagnetic compatibility (CEM). Limits on the voltage variations and fluctuations, flickering in the public low voltage networks for fittings with input voltage <16A by phase not suitable for a conditional connection
- NORM EN61547:2011, regarding fittings for illumination and general use. Requirements regarding the CEM immunity.

All the essential requirements regarding ecological design applicable to products related to the energy, prescribed in 2009/125/UE directive.

All the essential requirements regarding the hazardous substances restrictions in electrical devices, prescribed in the 2011/65/UE directive.

All the fittings have been 100% checked including the functional and safety tests.
